

CASE STUDY: CONSERVING WATER, SAVING TIME

Reducing water use, maintenance and green waste through smart technology and design

SOLUTIONS

- Removed the grass to reduce water consumption and maintenance
- Installed a stone patio and pathways with paving to enhance drainage
- Installed new irrigation system that receives daily weather updates and adjusts water use accordingly

RESULTS

- One year later the water bill was reduced by 50%
- Winner of the California Landscape Contractors Association Outstanding Achievement Award

“We’ve had the pleasure of working with JML since 1990 and have always been so pleased with their maintenance of our landscape. We recently decided to completely renovate our yard and went straight to Mike and Janet. In addition to decreasing our water use substantially we now have an enjoyable and restful backyard and a truly welcoming front yard.”

-Jane Melnick
